John Cockerill's first contract as a contractor for a biogas cogeneration plant

John Cockerill is currently carrying out its first order as a contractor in renewable energies, with the installation of a biogas cogeneration plant for the french fries producer Lutosa in Leuze-en-Hainaut (Belgium). This will be commissioned in mid-2022 and will enable Lutosa to reduce its CO2 emissions by 9,000 tonnes per year. John Cockerill, a global player in the energy transition, is proud to support its customer in its efforts to reduce its carbon footprint and produce responsibly.

The installation consists of a 1.5 MW electric motor, a 20 bar steam boiler, an acoustic chamber and auxiliary equipment. As a turnkey contractor, John Cockerill is in charge of its realization from A to Z: design, procurement and delivery, construction and assembly, installation on site and commissioning. Commissioning is scheduled for mid-2022.

Dieter Hasevoets, Head of Integrated Renewable Solutions at John Cockerill: "At John Cockerill, we are pursuing the ambition to decarbonize human activities and act against climate change. We are proud to collaborate with Lutosa on this project. We have studied their specific needs in order to offer them a tailor-made technological solution to optimize their energy consumption and reduce their carbon footprint. This is our first project as an EPC (Engineering, Procurement and Construction) contractor, a global approach that we intend to offer more and more often to our clients.

John Cockerill, leader in the energy transition

John Cockerill is a global player in the energy transition. With more than 200 years of experience in energy and industry, it designs and integrates innovative technological solutions to facilitate access to low-carbon energy. These technologies and expertise are dedicated to the production, storage and distribution of electricity from renewable energy sources and to optimizing the efficiency of power plants. They apply to steam gas, hydraulic, hydrogen, solar, nuclear, wind and biomass energy. To complement its commitment to the fight against climate change, John Cockerill is also deploying solutions to combat insecurity, produce responsibly, preserve natural resources and contribute to greener mobility. 1.01 billion in 19 countries on 5 continents in 2020.

John Cockerill, enabler of opportunities

Driven since 1817 by the entrepreneurial spirit and the thirst for innovation of its founder, the John Cockerill Group develops large scale technological solutions to meet the needs of our time: preserving natural resources, contributing to greener mobility, producing sustainably, fighting against insecurity and facilitating access to renewable energy.

Its offering to enterprises, States and communities comes in the form of services and associated equipment for the energy, defense, industry, environment, transport and infrastructure sectors.

Driven since 1817 by the entrepreneurial spirit and thirst for innovation of their founder, the 5 000-strong workforce of the Group enabled it to achieve turnover in 2020 of 1.01 billion Euros in 22 countries across 5 continents.
